

Your child's summer work will be completed on IXL.com or on the IXL app (that can be downloaded for free). You should all be familiar with IXL. Sign into IXL.com using username and password. You see a green bar across the top, click on Learning and select the grade and skills. All required skills should have a yellow star next to it. Locate the specific skill listed and answer the questions until your child has reached at least an 85% (proficient).

Below are links for your reference to skills for NWEA MAP Growth.

K-2

Classes in each grade-level with the most participation will receive a movie/popcorn party.

Students with 60 minutes or more on IXL can receive a dress-down day and 5 House Points

Their summer work was designed with the intention that they should be going on IXL two to three times a week over the summer. This is meant to keep their brains working throughout the summer and to help them remember all that they learned this past year in math. We will be monitoring their progress throughout the summer. Again the purpose is keeping their brains active all summer!

We also encourage the students to read over the summer. Please check out the summer reading program at the Strongsville Library! Post your summer "must reads" to Instagram and Facebook with #sjsreads.
